

LDX Solutions (LDX) headquartered in Kennesaw GA is pleased to announce the acquisition of **Western Pneumatics Inc.** (WPI) with manufacturing and service locations in Eugene OR and Ruston LA.

This transaction is the culmination of the strong working relationship that LDX and WPI have built over the years and reflects industry desire for more complete project solutions from design through installation. Going forward, LDX will be better positioned to meet client needs through our state-of-the-art technology and integrated project offerings.

"For many years, WPI has been an important partner for LDX, providing fabrication and installation support on many of our projects in the wood products industry. By bringing WPI under the LDX umbrella, we will be able to provide our customers across a wide range of industries integrated air pollution control and plant optimization solutions. The manufacturing, installation and commissioning expertise that WPI brings will play an important role in our traditional project business as well as our ongoing product development and rollout programs."

William O'Shea
CEO LDX Solutions

"LDX was the ultimate choice for us because of the great synergies between the two organizations. We believe that LDX will be a good fit with the WPI organization and together we will have a great blend of products to manufacture, install and service. WPI will be an integral part of the continued growth of the LDX Businesses as together, we will offer a broader footprint of capabilities to our customers to help them with their needs."

Bob Marshall
CEO Western Pneumatics Inc.

WPI will operate alongside and work closely with the Air Pollution Control and Process Systems divisions within LDX.

Integration activities between the two entities are ongoing and additional information will be communicated as we go forward. Please address any questions to your current contacts within LDX and WPI.
